

TO: Valued QuickLogic Customer
Subject: QuickLogic Product Discontinuation Notification
Tracking Number: PCN 040101 **Major Change: Class 1**

01/30/04

The intent of this letter is to inform you of QuickLogic's decision to permanently discontinue the manufacture of the pASIC 1 and pASIC 2 product lines due to the scheduled expiration of one of our wafer supply agreements. This discontinuation affects all package options, speed grades, and temperature grades. The base part numbers are shown below. See Attachment A for a complete list of all part numbers.

DEVICE BASE PART NUMBERS

<u>pASIC 1</u>	<u>pASIC 2</u>
QL8X12B	QL2003
QL12X16B	QL2005
QL16X24B	QL2007
QL24X32B	QL2009

Commencing with the date in this letter, your company has twelve (12) months during which time you may place end of life orders for these products, and you may schedule these orders over the next twenty (20) months. The key dates are:

Last date for placing orders: January 31, 2005
Last date for shipping orders: September 30, 2005

Every effort should be made to place your last time buy orders in a timely manner as product may have limited availability. Orders will be supported on a first-come first-served basis. Placing orders is not a guarantee of delivery, and priority will be given to the earliest orders. QuickLogic reserves the right to refuse orders if supply constraints prevent us from fulfilling the orders. All orders for these products will be non-cancelable and non-returnable.

Customers buying blank parts and programming themselves should take into account the programming yield when placing their orders. QuickLogic does not guarantee that we will be able to replace programming failures as product volumes decrease.

QuickLogic also reserves the right to increase pricing on new orders as lower overall production volumes lead to increased costs. Orders placed earlier will receive the most favorable pricing.

While QuickLogic will not offer any drop-in replacement devices, Attachment B shows a list of recommended devices which can perform the functions of the pASIC 1 and pASIC 2 devices. Several options exist for migrating existing designs to newer QuickLogic products. All migration products will require various degrees of engineering design considerations depending on the particular product. For further information on replacement devices, please contact your local QuickLogic FAE or QuickLogic's technical support at www.quicklogic.com/support.

Thank you for your attention to this matter. No response to this notification is required. Should you have any questions, please do not hesitate to contact your QuickLogic representative or distributor. Your continued interest in QuickLogic is greatly appreciated.

Sincerely,

QuickLogic Corporation
